PROFESSIONAL SUMMARY

Software Developer with hands-on experience in building backend systems, REST APIs, and AI-powered web applications using Python and Django. Skilled in database management, Docker, Git, and Linux environments with strong knowledge of Object-Oriented Programming, SDLC, and problem-solving.

EDUCATION

C. Abdul Hakeem College of Engineering and Technology, Ranipet District Expected Graduation: June 2026
Bachelor of Engineering (Computer Science Engineering)
CGPA: 8.1 / 10

INTERNSHIP EXPERIENCE

Femtosoft Technologies Jul 2025 – Aug 2025 | Chennai
Python Full Stack Developer Intern

- Developed backend functionalities for Python-based web applications using Django.
- Built and tested REST APIs for application communication and data handling.
- Worked with MySQL and MongoDB databases for storing and managing application data.
- Assisted in debugging backend and API-related issues to improve performance.
- Used Git for version control and collaborated in agile development workflows.
- Worked in Linux environments for development and deployment tasks.
- Supported Docker-based containerization for application deployment.

PROJECTS

AI Fake Review Detection System Apr 2026 – May 2026

- Developed a browser extension to analyze online reviews from webpage content.
- Built a fake review detection system using NLP techniques and Random Forest Classifier.
- Created REST APIs using Django for machine learning prediction workflows.
- Used Docker and Gunicorn to optimize backend deployment performance.
- Improved real-time review analysis and response handling.

Technologies Used: Python, Django, REST API, Machine Learning, Docker, MongoDB

Course Aura (An AI course builder) Oct 2025 – Nov 2025

- Developed backend APIs for AI-based course generation workflows.
- Implemented authentication and secure API access control.
- Integrated MongoDB for scalable data storage and retrieval.
- Followed SDLC practices including testing, debugging, and documentation.
- Designed modular backend architecture for future scalability.

Technologies Used: Python, Django, MongoDB, REST API

SKILLS / TOOLS

Programming Languages: Python, Java, JavaScript.
Frameworks & Technologies: Django, HTML5, CSS3, REST APIs, JSON .
Databases: MySQL, PostgreSQL, MongoDB.
Tools & Platforms: Git, GitHub, Docker, Linux, VS Code .
Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, SDLC, Debugging, Problem Solving

CERTIFICATIONS

React.js (Course) — GUVI October 2025
Google Cloud Engineer Learning Path — Google Cloud Skills Boost May 2025
Google Cloud Data Analytics (Beginner) — Google Cloud Skills Boost December 2024
Web development (Internship) — CODSOFT July 2025
